

Dissolution of the Axos Republic

On 23/5/2026 (Day 200), at 00:00 GMT, the Axos Republic will be dissolved, and replaced with the *Axian Empire*. The Axian Empire will have an identical government structure to the AXR, and will also keep the state-republics. All the digital systems such as the database, legal document, website, archive, assets, reports, repositories, projects, and kernels will be transferred, and actively used by the Axian Empire. All members will also transfer and keep their metadata.

The state-republics will also be losing their 'Democratic' titles (eg, Democratic Republic of Hillside > New Hillside Republic) and replace it with 'New'. The Oblasts will also keep their names. Below are the new state-republics:

- New Hillside Republic
- New Axian Republic
- New Brokenwood Republic
- New Swedish Republic

Notably this is the first time Axia has adopted a descriptive prefix unlike its sisters. Also, despite the fact the Liberal Democratic Party has been dissolved, no future parties containing the words below will be allowed to run in elections:

- Communist
- Socialist
- Democratic
- Marxist
- Nationalist
- Capitalist
- Liberalist
- Fascist

All parties which attempt to force religious ideology onto their state-republics will also be disallowed from running in elections (Cultures native to the state-republics are allowed, e.g. Hillianism, Axism)

The change will not be going under 3.5.1 as that is intended for an emergency. Below is the signature of Lordos Axos, confirming the dissolution of the Axos Republic, de-unification of the four state-republics, and re-unification under the Axian Empire.

Lordos Axos, 16:24 GMT, 17/05/2026
