Immediate Mafia Threat

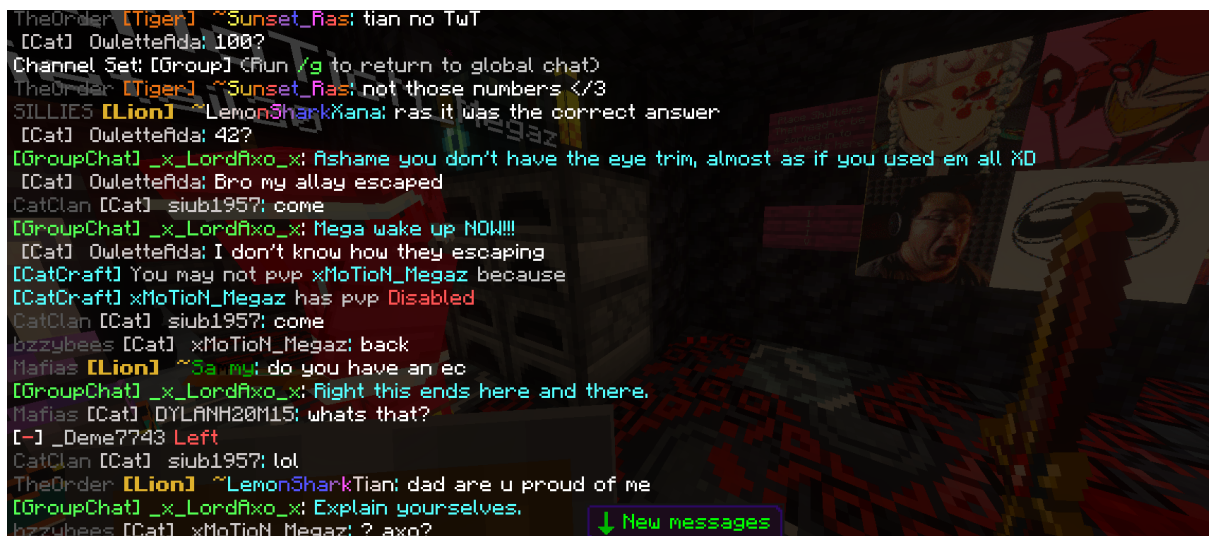

24th of June 2026, around 17:00 GMT. The ally of the Axian Empire, _IVYRevy reported to Lordos Axos that a invisible player in netherite armour was lingering at the new Arisk Oblast of the NHR.

The Mafia have been attributed the blame for the situation and there is now an immediate internal threat from the Mafia. Particularly within the New Hillside Republic.

On the pages below is a mass of evidence, with some captions explaining the current affairs:

The images above are from a case many months ago, when beathecutea discovered many secret passages in her home. Someone has obviously left a log, and the encrypted text mainly just blabbers on about _Roaaoiia1213 being a member of the Mafia. From what Lordos Axos' could gather someone had been impersonating Roaa, to gain intel on beathecutea. It is hard to tell really.

Back onto the main case, Mega is part of a Mafia network which has been gathering intelligence on many people. Primarily those in sensitive positions.

Below is a list of the known members:

- xMoTioN_Megaz is an elite (diamond trim) member of the Mafia
- _Zombietail20 is either an elite member, or some form of custom rank, she has been seen wearing a purple uniform, which is not a known Mafia rank.
- ~Bzzy_Mui is a member of the Mafia of unknown rank, most likely gold or a diamond elite.

Notably there was 6 empty armour stands in one of Mega's bases, which would suggest there is another 3 people in this branch of the Mafia. There is also a probable leader of the Mafia yet to be revealed.

So far, 2 different variations of Mafia soldiers have been seen. They are most likely using the Unstable SMP's Mafia's rank system:

- Leader (no trim or armour)
- Redstone, 2nd in command
- Netherite (trim), 3rd in command
- Quartz, special ops/leadership role

- Diamond, elite soldier
- Gold, attack coordinator
- Iron, lesser attack coordinator
- Copper, similar to an Axian Empire commander
- (no trim), soldier

This Mafia has an amethyst rank, which is most likely a custom rank similar to Quartz. If they are coming up with new ranks, then they may have an emerald rank.

The intentions of the Mafia are uncertain, but it may well be likely that they wish to takeover the New Hillside Republic or even the Axian Empire and brutally control its people.

Inside of one of Mega's bases, is an area that is farming happy ghasts, they may possibly be using these for an attack.

Suggested Course of Action

The Sentry views this as a direct internal threat, that must be tackled with immediatly. Below are some possible ideas on what should be done to tackle it:

- Slow internal investigation - keep RSL. Mega in his position and let the Mafia probe internally, while the Axian Empire uses their presence to gather intelligence.
- War - Declare war on the Mafia and engage in an all-out conflict against them, kill any Mafia persons on sight.
- Removal - Remove RSL. Mega and intentionally spread all the classified documents so the public can see what is happening.

Issues with each idea:

- Slow internal investigation may be too slow, and the Mafia may do something while they are being investigated. For this to work all must act as if there is nothing going on, which may tempt them to attack.
- War will cost many lives and may escalate into a nuclear war. On the initial encounter at the Arisk Oblast the Mafia were using an unknown explosive to deal damage. The reputation of the Axian Empire and its SRs may also shatter.
- Removal may force the Mafia into attack phases and may end up with a future insurgency. Intentionally leaking classified documents may also have unintended consequences.
